

Arunjunai Kumar Ganesan

Software Engineer

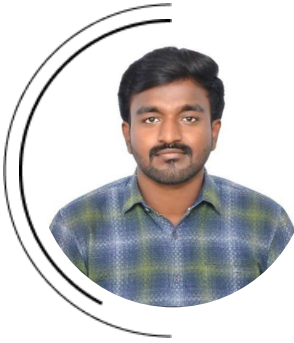

4 Years 0 Month

(+91) 6379619515

arunjunaikumar1999@gmail.com

Profile Summary

Dedicated Software Engineer with **4years of experience** specializing in **backend development** using **Java, Spring Boot, Microservices, REST API, and PostgreSQL/MySQL**. Proven expertise in building scalable, high-performance applications and integrating advanced monitoring and analytics tools like **Dynatrace** and **Elasticsearch**. Adept at collaborating in agile environments and delivering solutions that enhance business operations, efficiency, and data integrity.

Education

MCA, 2022

Ayya Nadar Janaki Ammal College, Sivakasi

B.Sc, 2020

Virudhunagar Hindu Nadars' Senthikumara Nadar College (VHNSNC), Virudhunagar

12th, 2017

Tamil Nadu, English

10th, 2015

Tamil Nadu, English

Work Experience

Feb 2022 - Nov 2024

Software Engineer

Relevantz technology services

I'm a dedicated Java Fullstack developer with 2.7 years of experience using Spring boot, PostgreSQL and frontend development using ReactJS, HTML5,CSS,MUI . Proven ability to develop robust web applications and collaborate effectively on full-stack projects. Adept at working in diverse technical environments and contributing to project success with a strong focus on efficiency and quality.

Nov 2024 - Present

Software Engineer

Mindsprint

Dedicated Software Engineer with 4 years of experience specializing in

Key skills

- Java8
- Java Spring Boot
- Postgresql
- MySQL
- Restful Web API Development
- Microservices
- Eureka
- Dynatrace
- Kibana
- Elastic Search
- Bigquery

Personal Information

City Chennai

Country India

Hobbies

- Bike travel
- Playing cricket
- Listening songs

Languages

- Tamil
- English

backend development using Java, Spring Boot, Microservices, REST API, and PostgreSQL/MySQL. Proven expertise in building scalable, high-performance applications and integrating advanced monitoring and analytics tools like Dynatrace and Elasticsearch. Adept at collaborating in agile environments and delivering solutions that enhance business operations, efficiency, and data integrity.

Projects

21 Months

Quatar Insurance Company

Developed a comprehensive Insurance Management System using Spring Boot for backend services and PostgreSQL for database management. Created RESTful APIs to handle various functionalities such as policy management, claims processing, and user authentication. Implemented JWT-based authentication to manage distinct roles, including Employee, Customer, Agent, and Corporate users. Collaborated with cross-functional teams to integrate frontend components and optimize application performance. Employed Maven and Git(Source tree) for build management and version control. Enhanced application security and scalability through effective backend architecture and robust API design.

3 Months

Viedoc -ETMF

Worked as a frontend developer for 6 months, utilizing Lit Framework for creating web components and ReactJS for the frontend. Developed a comprehensive web application focused on virtualizing patient reports and documents. Implemented a virtual meeting feature, facilitating client-doctor connections based on availability. Streamlined client report tracking and communication with doctors, enhancing overall efficiency in healthcare services.

12 Months

OFIS (Olam Farmer Information System) - Mindsprint

An agriculture-based application enabling farm and plot registration, deforestation validation, and compliance tracking across multiple business units (cocoa, coffee, cashew, etc.) in different countries.

- Developed and maintained backend services using Spring Boot and MySQL.
- Integrated Dynatrace and Kibana for performance monitoring and log tracking.
- Implemented modules for deforestation analysis, PA legality, and GFW (Global Forest Watch) integration.
- Designed APIs for farmer privilege management and child labour surveys, supporting field enumerators for data collection and follow-up surveys.
- Contributed to enhancing transparency and traceability in agricultural transactions between farmers and businesses.
- Awarded the Performance Excellence Award for outstanding contributions to project success.

12 Months

GeoDB - Mindsprint

A backend system designed to facilitate deforestation and legality analysis by managing geospatial data flow between OFIS and the NGIS team.

- Developed microservices in Spring Boot to process and transfer polygon

(GeoJSON) data between PostgreSQL and BigQuery.

- Built a scheduler to automate data synchronization and result retrieval between systems.
- Integrated GFW APIs for real-time compliance verification and status updates.
- Improved system efficiency by optimizing data handling and ensuring seamless communication with external analytical systems.

Certification

- Diploma in IOT
- Computer hardware technology

AWARD

Performance Excellence Award

Awarded the Performance Excellence Award for outstanding contributions to project success in Mindsprint.
