📄 PROFESSIONAL SUMMARY

QA Engineer with 5+ years of IT experience and 2+ years in software testing across healthcare and telecom domains. Hands-on in manual testing and automation using Selenium and Playwright, with experience automating regression scenarios and validating complex business workflows. Strong in test design, defect management, and Agile delivery.

📁 PROFESSIONAL EXPERIENCE

Software Tester (QA)

Value Health Inc

07/2023 – 08/2024 | Coimbatore

Project: Patient Nexus (Patient Support Program Platform) | Client: Boehringer Ingelheim

Key Responsibilities and Contributions

- Evaluated business requirements and user stories for a Salesforce-based healthcare application supporting patient enrollment and assistance programs.
- Designed and executed 120+ manual test cases covering patient enrollment, eligibility verification, benefit processing, case management, and engagement tracking workflows.
- Conducted functional, regression, smoke, and sanity testing across Salesforce Lightning and Life Sciences Cloud modules.
- Verified end-to-end patient workflows, ensuring accurate data flow from intake, through eligibility, and case updates.
- Reported, tracked, and verified defects in JIRA, actively participating in defect triage discussions and release readiness decisions.
- Collaborated closely with business analysts and developers to clarify eligibility rules and compliance-sensitive logic.
- Implemented Playwright automation using JavaScript/TypeScript for stable regression scenarios, automating 30–40% of critical UI validations.
- Reduced regression execution time from hours to minutes by integrating automated test runs for repeatable workflows.
- Acted as a QA point of contact during sprint testing, ensuring critical workflows were validated prior to release.
- Contributed QA inputs during Agile ceremonies, including sprint planning and sprint reviews.

Software Engineer (QA)

Tech Mahindra Ltd

05/2021 – 07/2022 | Chennai

Project: Non-SIM Management | Client: Rogers.

Key Responsibilities and Contributions

- Reviewed functional and technical requirement documents for a telecom service management web application.
- Designed and executed 80–100+ test scenarios and test cases covering service activation, service modification, and customer account workflows.
- Executed functional, integration, and regression testing across multiple sprint releases.
- Performed backend validation using SQL queries to verify service status, data consistency, and transaction accuracy.
- Utilized Postman to validate API responses, status codes, and payload integrity for critical service operations.

🧠 SKILLS

Test Automation

Playwright (JavaScript / TypeScript), Selenium WebDriver, Page Object Model (POM), UI Automation, Cross-Browser Testing

Manual & Functional Testing

Functional Testing, Regression Testing, Smoke & Sanity Testing, End-to-End Workflow Validation, UAT Support

API & Backend Validation

Postman (API Testing), SQL (Basic Queries), Backend Data Validation

Tools & Platforms

JIRA, Git (Basic), Salesforce Lightning

🏆 ACHIEVEMENTS

Newcomer Award

- Received Newcomer Award for quick ramp-up and consistent delivery.

Bravo Award

- Awarded Bravo Award and client appreciation for maintaining quality standards.

Automation Testing (recognized as AQT Ninja at Tech Mahindra)

- Reported and tracked defects in JIRA, collaborating with developers to resolve issues and improve overall test coverage.
- Automated selected repetitive regression scenarios using Selenium WebDriver, Java, Cucumber (BDD), and TestNG.
- Created and maintained basic Gherkin feature files and step definitions, enabling readable and reusable automated test cases.
- Applied Page Object Model (POM) to improve script maintainability and reduce duplication.
- Applied Agile practices, actively contributing to sprint ceremonies and retrospectives.

Software Engineer (Network Engineer)

Tech Mahindra Ltd

04/2019 – 05/2021 | Chennai

Project: F20 Rural Client: BT Openreach

Key Responsibilities and Contributions

- Validated network design outputs for FTTX migration projects to ensure quality and compliance prior to deployment.
- Reviewed fiber routing, ducting plans, and configuration details to minimize design rework and delivery errors.
- Generated schematic diagrams and supported configuration validation activities.
- Trained new team members and supported production issues to ensure uninterrupted delivery.
- Promoted to QA responsibilities based on consistent quality standards and attention to detail.

Process Associate

Mr. Cooper Group

01/2018 – 01/2019 | Chennai

Project: Central Indexing Group. Client: J.P. Morgan and Chase.

Key Responsibilities and Contributions

- Built Excel-based loan tracking tools using macros to improve tracking efficiency.
- Processed and indexed customer loan documents using the Encompass system.
- Managed escalation tracking and coordination with onshore teams.

EDUCATION

Bachelor of Engineering: ECE

Meenakshi Sundararajan Engineering College

2017 | Chennai

PERSONAL PROJECTS

Leaf Taps (ERP Application Developed in JAVA)

- Automated all types of test cases and executed them sequentially and parallel.
- Integrated test cases with TestNG and Cucumber.

Salesforce Automation using Playwright

Developed Playwright (JavaScript/TypeScript) automation for Salesforce web app during hands-on training. Automated key UI flows and end-end framework level using Page Object Model. Used Playwright assertions and auto-wait, and analyzed results via HTML reports.

CERTIFICATES

Certified in Playwright Automation (JavaScript / TypeScript)

TestLeaf Software Solutions

Certified in Selenium Automation Testing (Java)
