SUMMARY

Automation Test Engineer with 4+ years of experience in designing, developing, and maintaining scalable automation frameworks using Selenium WebDriver, Playwright, TestNG, Java and JavaScript. Strong experience in API testing using Postman and backend validation using SQL (Oracle, MySQL). Proven expertise in regression, smoke, and cross-browser testing, CI/CD integration using Jenkins and Git, and Agile/Scrum delivery in Banking and Airline domains.

EDUCATION

Sri Manakula Vinayagar Engineering College <i>B-tech in Computer Science and Engineering; GPA: 7.03</i>	<i>Pondicherry, India</i> <i>Sep 2017 - Sep 2021</i>
---	---

SKILLS SUMMARY

- **Languages:** Java, JavaScript, SQL, JSON, XML
- **Automation Tools:** Selenium WebDriver, Playwright
- **Frameworks:** TestNG, BDD Cucumber, POM and Hybrid framework.
- **Tools:** Postman, Git, GitHub, Eclipse, Jira, SQL Developer, ADB, Android Studio Emulator
- **Databases:** Oracle, MySQL
- **Build & CI/CD:** Maven, Jenkins
- **Testing Types:** Smoke, Regression, Sanity, Cross-Browser Testing

EXPERIENCE

State Bank of India, Senior Test Engineer , Tech Mahindra – Chennai	Feb 2025 – Oct 2025
• Conducted Automation, functional and mobile app testing for banking modules like login, registration, payments, debit. • Performed backend data validation using Oracle and MySQL to verify transaction records, ensuring 100% data accuracy. • Automated key payment workflows using TestNG, reducing manual effort and increasing coverage. • Generated detailed Extent Reports to improve visibility of test results and facilitate faster QA sign-offs.	
Riyadh Airlines, Test Engineer , TCS – Chennai	Nov 2022 - Feb 2025
• Tested web and mobile platforms for ticket booking, flight search, payment, and user profile management. • Performed API testing using Postman for ticket confirmation, payment gateways, and booking history modules. • Built and executed automation scripts using BDD Cucumber and reduced manual regression effort by 40%. • Validated transaction-level data with Oracle and MySQL, ensuring accurate booking and payment processing. • Delivered detailed reports using Extent Reports, supporting faster defect triaging and improved test traceability.	

PROJECTS

Project Title: State Bank of India, YONO Business Web

Client: State Bank of India
Domain: Banking
Role: Test Engineer
Division: Automation & Backend Testing
Description: The goal of this project was to streamline State Bank of India’s YB Web, an enterprise-level banking platform used for managing customer services. The project involved end-to-end automation of core banking modules, along with backend validation for Incident and Demand workflows to ensure stability, accuracy, and compliance with banking standards.
Roles and Responsibilities
• Developed and executed UI automation scripts for YB Web using Selenium and TestNG framework with Java. • Designed and enhanced POM-based automation framework to improve reusability and reduce execution time. • Automated critical banking workflows including customer onboarding, transaction validation, and internal service requests. • Executed smoke and regression test suites as part of CI/CD pipeline before production releases. • Performed backend testing for Incident and Demand modules by validating workflow actions, assignment logic, status transitions, and SLA rules. • Executed SQL queries to verify data integrity, transaction entries, incident updates, and backend logs. • Collaborated with business analysts and developers to analyze requirements and create test scenarios.

- Logged and tracked defects in Jira, ensuring proper resolution and retesting.
- Participated in Agile ceremonies including sprint planning, refinement, and daily standups.
- Integrated automated test execution with Jenkins as part of CI/CD pipeline.
- **Tools & Technologies Used:** Java, Selenium, TestNG, Eclipse, SQL Developer, Jira, Jenkins

Project Title: Riyadh Airlines

Client: Riyadh Airlines
Domain: Airline Industries
Role: Test Engineer
Division: Automation + API testing
Description: Worked on Riyadh Airlines’ ticket booking and transaction management platform, ensuring high-quality delivery of features like flight search, ticket booking, payment processing, and user account management across web and mobile applications. Performed manual and mobile app testing to validate user journeys and transactional workflows. Conducted API testing using Postman for backend services and performed database validations using Oracle and MySQL. Developed automated test scripts using TestNG for payment and booking modules, with detailed reporting via Extent Reports. Contributed to improved system reliability, faster release cycles, and enhanced customer experience in a critical real-time aviation environment.

Roles and Responsibilities

- Performed mobile app testing for flight booking, ticket management, and payment modules across web and mobile platforms.
- Conducted API testing using Postman to validate booking, payment, and user-related backend services.
- Developed and maintained automated test scripts using BDD Cucumber with java for critical booking and transaction workflows.
- Utilized Oracle and MySQL to perform backend data validation and ensure transaction accuracy.
- Generated detailed test execution reports using Extent Reports to support faster defect analysis and improve release quality.
- **Tool & Technologies Used:** Java, Selenium, BDD Cucumber, Eclipse, SQL Developer, Jira, Jenkins, ADB, Android studio emulator

Project Title: E-Commerce Website Test Automation with Playwright

Domain: E-Commerce
Role: Test Engineer
Division: Playwright Automation
Description : Built an end-to-end Playwright automation framework covering login, product search, cart, and checkout flows and implemented cross-browser execution across Chromium, Firefox, and WebKit, improving test reliability.

Key Features

- Automated Login: Validates user authentication with both valid and invalid credentials.
- Product Interaction: Searches and adds products to the cart.
- Cart Verification: Confirms correct items and quantities are displayed.
- Cross-Browser Testing: Runs seamlessly on Chromium, Firefox, and WebKit

CERTIFICATION

- Pre-Security from TryHackMe
- Automation in Cypress

DECLARATION

I certify that all information included within this resume is accurate and verifiable.
