Career Objective

Senior Software Engineer with 6+ years of experience in React and related technologies, aiming to drive innovation and efficiency. Committed to continuous skill enhancement and contributing to high-quality software solutions.

Professional Summary

- 6+ years of experience in developing, maintaining, upgrading, testing, and supporting React applications across Insurance, Music, Hotel Management, Job Portals, and Education domains.
- Proficient in Typescript, React.js, JavaScript, Playwright, Material-UI, Lodash, HTML5, CSS, MongoDB, AWS, and Jest.
- Experienced in direct client interaction, requirements gathering, product analysis, time estimation, development, deployment, and product demonstrations.
- Adept in Agile and Waterfall methodologies, consistently delivering results within timelines and budgets.
- Skilled in state management (Redux, Context API, React Hooks), component-based architecture, UI libraries (Material-UI, Ant Design), testing (Jest, React Testing Library, Playwright), routing (React Router), and API integration (REST APIs).
- Experienced in building scalable APIs and server-side applications with Express.js.
- Implemented user authentication with JWT, OAuth, and session-based systems.

Technical Skills

Programming Languages: React.js, TypeScript, JavaScript (ES6+), Node.js, React Native

Frontend Technologies: HTML5, CSS3, Bootstrap 4, Material-UI (MUI), Ant Design

Backend Technologies: Node.js, Express.js, RESTful APIs, Redis

Databases & Cloud: MongoDB, AWS (DynamoDB, Lambda, Step Functions, API Gateway, S3, EC2, CloudFront, Terraform)

State Management: Redux, Context API, React Hooks

Testing Tools: Jest, React Testing Library, Playwright

Version Control & CI/CD: Git, GitHub, GitLab, AWS CodePipeline, GitHub Actions

Project Management Tools: Jira, Rally, Confluence

Methodologies: Agile (Scrum), Waterfall

Other Skills: Responsive Design, Cross-browser Compatibility, Authentication (JWT, OAuth), API Integration, Documentation, Client Communication

Operating Systems: Windows, Linux

Education

B.Tech in Computer Science and Engineering

Rajiv Gandhi College of Engineering

2015 – 2019

Employment History

Senior Software Engineer

LTIMindtree, Chennai

July 2022 – Present

Software Engineer

StudioQ Web Solutions, Pondicherry

Sep 2019 – July 2022

Professional Experience & Projects

Travelers, USA – Business and Personal Insurance Solutions

Role: Senior Software Engineer / React Developer

Team Size: 7 / 5

Technologies: React (TypeScript/JavaScript), AWS, Terraform, MongoDB, Playwright

- Participated in all phases of SDLC: requirements gathering, time estimation, design, development, unit testing, deployment.
- Prepared functional and technical documentation.
- Built scalable and secure insurance solutions for personal, business, and specialty coverage.
- Provided production support and handled high-severity issues (HSP).

Yalmaa Digital Agency – Safebuy Dealers (Mobile Vehicle Inspection)

Role: Fullstack Developer

Team Size: 1

Technologies: React.js, JavaScript, Express.js, Redis, Redux

- Led full stack development and contributed to architecture design and deployment.

- Engaged in client discussions for requirement gathering and product demonstrations.
- Built middleware for secure API data handling (access tokens, client IDs, secrets).
- Developed and maintained responsive UI components for a seamless pre-purchase experience.

Artium Academy – Artium Admin (Music Education Platform)

Role: Software Developer

Team Size: 4

Technologies: React.js, JavaScript, Redux

- Focused on frontend development and contributed to architecture design and deployment.
- Participated in client discussions for requirement gathering and product demonstrations.
- Developed and maintained responsive UI components for the admin dashboard used by tutors.

Nurtem, USA – Nurtem (Learning Marketplace)

Role: Frontend Web Developer

Team Size: 6

Technologies: React.js, JavaScript, Node.js, AWS

- Led frontend development and contributed to architecture design and deployment.
- Engaged in client discussions for requirement gathering and product demonstrations.
- Built middleware for secure API data handling.
- Developed and maintained responsive UI components for seamless online/offline learning experiences.

Hopsticks – Restaurant Panel

Role: Frontend Web Developer

Team Size: 4

Technologies: React.js, JavaScript, Node.js

- Designed and implemented frontend architecture for a visual food discovery platform.
- Participated in requirement analysis, time estimation, UI development, and deployment.
- Created intuitive and visually appealing interfaces to enhance user engagement.
- Authored technical and functional documentation.
