SUMMARY

Java Developer with 4 years of proven experience in architecting high-performance **Multithreaded** applications and deploying scalable Microservices and **RESTful APIs** using **Java and Spring Boot**. Skilled in optimizing backend performance, integrating MySQL database and ensuring robust code quality through comprehensive testing and rigorous code reviews.

TECHNICAL SKILLS

Programming Languages

Java, Python

Databases

PostgreSQL, MongoDB, MySQL, DB2

Architecture

REST APIs, SOAP Web Services, Microservices, Design Patterns, Event-Driven Architecture (Kafka, RabbitMQ)

Frameworks & Libraries

Spring Boot, Spring Data JPA, Spring Security

ORM Frameworks

JPA, Hibernate

DevOps & Tools

Git, GitHub, BitBucket, Jenkins, Maven, Volante, Docker, Postman

WORK EXPERIENCE

JAVA Developer

Tata Consultancy Services

Client: Citi Bank

12/2021 – Present | Chennai, India

- Designed and implemented **multithreaded Spring Boot applications** for **payment processing**, optimizing **concurrent transaction handling** by **60%** while maintaining **thread safety** and **data integrity**.
- Designed and implemented both **RESTful APIs** and **SOAP-based web services** alongside asynchronous message processing pipelines (Kafka/RabbitMQ) to facilitate seamless payment data integration between legacy banking systems and modern microservices, improving system interoperability by 30%.
- Improved **code quality** and **maintainability** by increasing **SonarQube coverage** from 0% to **80%**, enforcing **clean code practices** and reducing **technical debt**.
- Proficiency in routing payments through **Spring /Spring Boot, Queues, and RESTful web services**.
- Implemented **test-driven development (TDD)** practices within **continuous integration** pipelines using Jenkins, increasing code coverage from 0% to 80% and reducing regression bugs by 45%.
- Delivered a **20% improvement** in **system performance** by driving enhancements in **microservices** and **transformations**. Implemented **automation** for **volante jar build** leading to **35% reduction** in **manual intervention** and **15% boost** in **delivery timelines**.
- Upgraded **dependency management** using **centralized parent POM**, cutting **redundancy** by **40%**. Collaborated with **business analysts** to define **requirements** and prepared **impact analysis documents** for payment processing systems. Utilized **Volante tool, Java** for developing and modifying **message transformations** to streamline **payment processing** and ensure successful **project delivery**.
- Actively participated in all phases of **software development life cycle (SDLC)** as **Agile Scrum** team member, contributing to **sprint planning, retrospectives**, and **continuous improvement** efforts.

EDUCATION

Bachelor of Engineering, Mechanical Engineering

SNS College of Engineering

[CGPA - 8.2]

06/2017 – 03/2021 | Coimbatore, India

CERTIFICATIONS & ACHIEVEMENTS

MongoDB SI Associate Certification

Nov 2023

Microsoft Certified: Power Platform Developer Associate

Aug 2023

Recognized with the 'On The Spot' award for delivering critical project milestones

Awarded the 'Star of the Month' for exceptional ownership and excellence
