

MOHAN K

Software Test Engineer

Chennai | 9677756330 | ermohankm@gmail.com

SUMMARY

Detail-oriented Software Test Engineer with over 3.8 years of experience in Functional and Manual Testing. Proficient in SDLC, STLC, and defect management. Experienced in performing multiple types of testing, collaborating in Agile environments, and delivering high-quality results through strong analytical and problem-solving skills.

EXPERIENCE

Software Test Engineer | Kripya Solutions | Chennai | Sep 2025 – Present

- Working as a Software Test Engineer focusing on Functional and Manual Testing.
- Performing testing on the Centric application integrated with Adobe Connector to validate process synchronization.
- Understanding and analyzing workflow between Adobe Connector and PLM systems for process accuracy.
- Collaborating with cross-functional teams to ensure testing coverage and timely issue resolution.
- Currently undergoing training on Adobe Illustrator Connector, Product Lifecycle Management (PLM), and Centric Software to enhance technical proficiency.

Senior Software Analyst | Capgemini | Chennai | Oct 2024 – Jul 2025

- Worked as a Functional Tester for the Volkswagen Group project, contributing to both manual and automation testing processes.
- Performed Selenium automation testing for web applications, ensuring functionality and UI consistency across modules.
- Conducted Manual API testing using Postman, validating request/response parameters and ensuring correct backend integration.
- Collaborated with cross-functional teams to analyze requirements, prepare test scenarios, and ensure timely defect resolution.
- Involved in defect reporting and tracking using JIRA, and participated in daily Agile/Scrum meetings.
- Ensured quality deliverables by performing regression, integration, and functional testing.

Software Analyst | Capgemini | Chennai | Mar 2022 – Sep 2024

- Started my career as a Manual Tester in the Volkswagen project, gaining hands-on experience in test case design, execution, and defect reporting.
- Designed and executed test cases based on software requirements and functional specifications.
- Performed end-to-end manual testing across various platforms and devices to ensure application stability.
- Validated data accuracy and business rules by conducting test runs across different test environments.
- Logged bugs clearly and effectively, including steps to reproduce and screenshots, to assist developers.
- Participated in review meetings and walkthroughs to understand requirements and clarify doubts.
- Maintained test execution logs and status reports for daily and weekly updates to stakeholders.
- Actively supported User Acceptance Testing by coordinating with business teams.
- Involved in all phases of STLC including requirement analysis, test planning, test case design, execution, and closure.
- Collaborated effectively with developers and business analysts throughout the SDLC to ensure defect-free releases.
- Ensured traceability by mapping test cases to requirements and maintaining test coverage throughout the project lifecycle.

KEY ACHIEVEMENTS

- Received the 'Inquisitor Award' for fostering a culture of learning and contributing to the success of the organization.
- Recognized for active participation in team initiatives, improving testing standards, and enhancing collaboration.
