PROFESSIONAL SUMMARY

Java-centric Developer with **7.4 years of experience** in building enterprise applications. Brings **6.4 years of strong Java experience in large-scale Android applications** and **1 year of professional experience as a Java Full Stack Developer** using **Spring Boot, Microservices, RESTful APIs, and React JS**. Proven expertise in **backend integration, debugging complex issues, and end-to-end system understanding**.

TECHNICAL PROFICIENCIES

- Languages: Java, JavaScript (ES6+), HTML5, CSS3
- Backend: Spring Boot, Spring MVC, Hibernate, JPA, RESTful APIs, Microservices
- Frontend: React JS, HTML, CSS, JavaScript, Bootstrap, AJAX
- Database: MySQL
- Cloud : AWS
- DevOps & Tools: Git, Maven, IntelliJ IDEA, Postman

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Ivy Mobility., Chennai

March 2022 – Nov 2025

Ivycpg Application

- Built secure REST APIs and tested in Postman.
- Implemented JWT-based authentication and role-based authorization.
- Optimized database queries and caching, reducing response time by 30%.
- Analyzed business requirements and translated them into technical specifications for both **frontend and backend components**.
- Designed and developed **RESTful APIs** using **Spring Boot, Spring MVC, and Spring Data JPA**.
- Developed **responsive user interfaces using React**, including reusable components, hooks, and state management.
- Integrated **React frontend with Spring Boot REST APIs**, handling data flow, validations, and error responses.

- Implemented business logic and integrated with **MySQL/Oracle databases**, ensuring efficient data handling.
- Used **Axios/Fetch API** for API communication and managed authentication tokens in the frontend.
- Developed unit and integration tests using **JUnit and Mockito** to ensure high-quality backend deliverables.
- Implemented **exception handling, logging, and application security using Spring Security** (JWT/Session-based).
- Optimized frontend performance using **lazy loading, component optimization, and efficient state updates**.
- Configured and deployed applications on **Tomcat and cloud environments**, supporting full-stack deployments.
- Refactored legacy code (both backend and frontend) to improve **performance, scalability, and maintainability**.
- Collaborated with **DevOps teams** for CI/CD pipelines using **AWS/GitLab Actions**.
- Worked closely with **QA and product teams** to identify and fix UI and backend bugs and implement feature enhancements.
- Followed **Agile/Scrum methodology**, participated in sprint planning, daily stand-ups, retrospectives, and code reviews.
- Provided **post-deployment support** and implemented enhancements based on end-user feedback.

Senior Software Engineer | VVDN Technologies., Chennai

Jun 2021 – March 2022

Handy Share Application

- The Mobile HandyShare App is developed to Record High Quality Video + Audio as well as Edit feature in Pro Version.
- Support Landscape too
- Added Trim and Equalizer Feature

- Show Audio in Wave and Meter format

Senior Software Developer | National Informatics Centre., Chennai

October 2018 – June 2021

NPCDCS Mobile Application (Departmental App)

- This is a first of its kind stand-alone project to carry out patient details in the Department of Health. This has the unique feature of taking all related details of each case details such as
 - Registration
 - Risk Factors
 - Screening Test
 - Follow-up Test
 - Radiology
 - Pathology etc..
- Implemented business logic in **Java**, maintaining modular and reusable code.

Process Associate | RR Donnelley., Chennai

September 2015 – January 2017

EDUCATION

Bachelor of Engineering (B.E) – Computer Science and Engineering
Anand Institute Of Higher Technology, Chennai — Graduated: 2015

PROFESSIONAL ATTRIBUTES

- Strong analytical and problem-solving skills
- Excellent communication and teamwork abilities
- Commitment to code quality and best practices
- Adaptability to fast-paced and dynamic environments

Regards,

Arul Livingston
