

P Dineshkumar
Java Developer

Email - pdineshkumar2407@gmail.com

Mobile - +918610849219

- A Java Developer with 6+ Years of IT experience in development of web applications using Java Technologies.
- Hands on experience programming in J2EE (Servlets, JSP), Core Java and Collections.
- Hands on experience working with Spring, Spring Boot & Restful Web Service, Microservices.
- Excellent communication, facilitation, and interpersonal skills; adept at collaborating with global, cross-functional teams in remote/virtual environments.
- Skilled in Microservices design & development, Cloud-Native applications, APIs.
- Proven ability to build scalable, reliable, and high-performance solutions with exposure to performance testing and optimization.
- Well-versed in SDLC, Agile (Scrum/Kanban), DevOps, and CI/CD practices.
- Proficient in designing and implementing RESTful services, messaging systems and stream processing solutions with expertise in both RDBMS, Teradata.
- Hands-on experience with RESTful API testing using Postman and SoapUI, skilled in interpreting and manipulating JSON payloads.
- Engaged in continuous learning through challenging projects, cross-functional collaboration, and exposure to financial industry practices.
- Extensive hands-on experience in Java with deep understanding of JVM internals, including memory management and garbage collection mechanisms.
- Certified in Microsoft Azure Fundamentals (AZ-900).

Education

Completed Bachelor of Engineering in Electrical and Electronics Engineering from Institute of Road and Transport Technology, Erode, Tamil Nadu between August 2015 to March 2019.

Projects

BUSINESS EVENTS

Jan 2022 – Present, Bank of America

Environment	: Java 8+, JSP, Servlets, HTML, Restful Web services, SQL, Maven, jQuery, Tomcat 9+, JavaScript, Microservices, GIT
Frameworks	: Spring MVC, Spring Boot, Spring Cloud
IDE's	: IntelliJ, Eclipse
Project Management	: Agile, Kanban
Project Role	: Software Engineer

Project Description (Payment and Transfer):

The Bank of America application provides users with secure and convenient options for managing financial transactions, including Payments, Transfers, Zelle, ACH, and Wire services. These features are accessible across both mobile and desktop platforms, enabling customers to initiate and schedule payments or transfers seamlessly.

Project Description (Business Events):

Business Event Metadata Tool is a web application used by the analysts to add or modify the data called Business Events that helps to capture the customer activity in the online and mobile banking platforms. All the logged events in the database are monitored against this tool.

Responsibilities:

- Developed scalable and maintainable backend services using Spring MVC for building robust web applications with clear separation of concerns across controller, service, and repository layers.
- Designed and implemented RESTful APIs for seamless integration between modules.
- Configured and optimized for efficient database interactions.
- Worked with backend engineers to optimize existing API calls.

INDUS LENDING SUITE**July 2019 – Jan 2022, Ebix Technologies Private Ltd**

Client	: Axis Finance Limited (AFL)
Environment	: Java 1.6, JSP, Servlets, Spring Core, HTML, Web services, Oracle PLSQL Developer, JBoss 7.1 and WebLogic
Frameworks	: BRMS (Internal)
IDE's	: Eclipse, STS
Project Management	: Waterfall
Project Role	: Analyst - Software Developer

Project Description:

Loan Origination System (LOS) is a web-based solution of loan products for bank requisite, financing sector which initiates for loan from the customer entry. It follows the workflow and moves the loan initiation case till the loan disbursement.

Responsibilities:

- Understanding the requirements, preparing the technical document and handling the development independently.
- Performing unit, integration testing, doing deployments in the servers and handling testing and production issues.
- Involving in all layers of the application architecture like UI layer, Controller, Database and deployment.
- Implemented web services to other applications, third parties and hosted services in LOS.
