Profile Summary

- Results-oriented Java full stack developer with 4.4 years of experience in designing and developing robust web applications. Strong knowledge of object-oriented programming principles and extensive experience in developing RESTful APIs using Spring Boot framework and responsive front-ends using Angular. Known for teamwork and timely delivery of clean, high-quality code, empowered by GenAI insights.

Functional Areas

- Analysis
- Software Design
- Development
- Documentation
- Debugging
- Dashboard Creation
- Integration support

Experience

Agilysys

September 2023 – Present

Java Fullstack Developer

Chennai, Tamilnadu

- Responsible for developing and maintaining Java Spring Boot, Angular applications for Pay product.
- Integrating third-party APIs and services into the existing application architecture confidently.
- Optimizing application performance and scalability through efficient coding practices and periodical performance analysis.
- Responsible for deployment of all java services in lower environments and maintenance.
- Played a key role in the migration of Java services to Spring Boot3, resulting in improved system stability and performance.
- Proactively utilized AI-assisted tools like ChatGPT and GitHub Copilot for faster debugging, documentation drafting and prototype generation which improves development turnaround time effectively.

Wipro

July 2021 – September 2023

Java Fullstack Developer

Bangalore, Karnataka

- Developed and maintained microservices based RESTful APIs using Spring Boot framework, resulting in improved efficiency and reduced response time.
- Conducted unit testing using JUnit and Mockito to ensure the quality and reliability of the code and verified sonar, fortify, blackduck scans while deployment.
- Explored ways to send a daily report of production status using splunk to team members via email, created and maintained dashboard for different api status.
- Actively contributed to code reviews to maintain code quality and identify areas for improvement.
- Participated in daily stand-up meetings and sprint planning sessions to track progress and prioritize tasks.
- Collaborated with cross-functional teams to gather requirements, design software solutions, and implement new features.

Chainsys Corporation, Inc

April 2021 – June 2021

Full stack Developer Intern

Chennai, Tamilnadu

- Acquired a comprehensive understanding of both frontend and backend development. I became proficient in utilizing Java for building robust server-side applications, while also gaining expertise in HTML, CSS, and JavaScript for creating interactive and responsive user interfaces.
- Deepened my understanding of programming skills by developing production ready web application.

Projects

Agilysys Projects | Java, Springboot, Microservices, Angular, MongoDB

January 2025

- Tyro Tap-to-Pay Integration:** Led the development of an onboarding application enabling seamless configuration and registration of Tyro payment terminals using Angular and Java/Spring Boot, improving deployment efficiency and simplifying merchant activation.
- Maya Gateway Integration:** Integrated a new payment gateway into the existing pay system and successfully deployed it to production.
- Binbase Identification:** Developed and exposed the restful API's for efficient bulk write and retrieval operations in MongoDB.
- FreedomPay Lodging Support:** Implemented lodging information functionality seamlessly within the existing architecture.
- Payment Routing:** Designed and implemented intelligent routing of transactions based on initial payment flows through microservices.

- Payment Onboarding portal: Developed an onboarding portal(Angular Application) to configure merchant details for transactions.
- Performance Optimization: Conducted load testing on payment microservices and mitigated identified performance bottlenecks.

Online Retail Store | *Java, Springboot, h2, Microservices*

November 2021

- Developed an eCommerce application with features of displaying items, adding items into cart and ordering items.
- Designed all important features as separate rest apis like order service, cart service etc.
- As each service having separate database, its results in easy scalability.
- Designed the whole application and integrated in a way to use eureka server, cloud config.

Banking Application | *Java, Springboot, React*

September 2021

- Designed a sample banking transaction system using Java to simulate the common functions of using a bank account.
- Used React to create a GUI that supports actions such as creating an account, deposit, withdraw, list all accounts, etc.
- Implemented object-oriented programming practices such as inheritance to create different account types and databases.

Musify-MusicApp | *Java, Servlet, Jsp, Postegresql*

May 2021

- Designed a web music application system using Java to provide the common functions of using a web music player.
- Music application having features of playing a song, trending songs, playlist creation, addition of songs by admin, new user signup and sign in etc
- Used jsp, bootstrap-css to create a GUI that supports actions such as creating an account, searching a specific song , playing, list all language songs, etc.
- Implemented industry standard best practices such as springboot project structure, code scanning tools etc.,.

Cab booking Application | *Javascript, Html*

April 2021

- Designed a sample cab booking application system using Javascript to simulate the common functions of booking a cab.
- Processed user inputted information in the javascript to return a subtotal price based on the distance selected by the customer.
- Used Javascript and html to create a webpage that supports actions such as price calculation, billing details and booking.

Technical Skills

Languages/framework: Java, Springboot, HTML/CSS, JavaScript, Angular, Reactjs, Hibernate, MongoDB, MySQL, Azure function app

Developer Tools: Eclipse, IntelliJ, VS Code, Postman, GitHub Copilot, Generative AI Platforms

Technologies: Jenkins, GitLab, Kibana, Splunk, Sonar Analysis, Fortify, blackduck, JUnit, Cucumber, Rancher, Azure deployment pipelines, Dynatrace

Certifications And Awards

Wipro: Springboot, Microservices Implementation, React, MongoDB, Full stack developer

Microsoft: Azure Fundamentals

Purple: HTML and CSS

Nptel: Problem Solving through programming in C

Udemy: Master Microservices with Springboot and Spring cloud, Modern Java-Learn java 8 features by coding it, Blockchain and Bitcoin Fundamentals, chatgpt - Master the art of prompt Engineering

Agilysys: Honored with the Team Player and Best Team Squad Awards for driving seamless collaboration and ensuring on-time project deliveries.

Education

Sri Eshwar College of Engineering

Bachelor of Engineering in Electrical and Electronics

Aug. 2017 – May 2021

Coimbatore, Tamilnadu

Saradha Vidhyalaya

Higher Secondary

Jun. 2016 – May 2017

Tirupur, Tamilnadu
