Demonstrated versatility in various tasks and maintained a proactive approach to meet project deadlines effectively.

Tata Consultancy Services(TCS)

HR Salary Dashboard - Train the Dataset and Predict Salary

- The HR Salary Dashboard is a tool that uses data analysis and machine learning to train a dataset of employee information and predict salaries based on various factors such as job title, experience, and education level.

The Sparks Foundation

Data Science and Business Analytics–Internship

- Exploratory Data Analysis (EDA) in terrorism involves using statistical and visualization techniques to analyze terrorist activities. EDA can identify patterns, trends, and relationships between variables, such as types of attacks, locations, and perpetrators, that can inform counterterrorism efforts and policy decisions.

➤ **SKILLS:**

• Professional Motorcycle Athlete • CAD (solid works) • Vehicle Dynamics & performance tuning • Machine learning and cutting using CNC. • Racing & Track Performance Evaluation • HR policy Knowledge	• Communication proficiency • Data analysis • Problem Solving • Customer support executive • Business development executive
---	---

➤ **CERTIFICATIONS AND ACCOMPLISHMENT:**

- C Programming
- CNC machine cutting and learning.
- Introduction to Automotive Systems
- Powertrain Systems & Transmission Fundamentals
- Automotive Suspension & Braking Systems
- Vehicle Dynamics courses
- Microsoft Excel
- SQL and Python
- 2024 National Motorcycle racing Champion in Stock 400cc.
- Level 1 & 2 in CNC machine learning and cutting in Millwright institute.

➤ **PROJECTS Published:**

1. Production of bio diesel including its advantages and disadvantages to increase its efficiency.
2. Vehicle Efficiency Research – Investigated fuel blends for improved engine performance in small-displacement motorcycles
