

RAJADURAI ARIVAZHAGAN

Backend developer

rajaduraimax96@gmail.com | 9600376187 | Shollinganallur, Chennai | 6 years experience

OBJECTIVE

Backend Software Developer with over 6 years of experience designing and developing microservices using Java and Spring Boot. Skilled in REST API development, asynchronous communication, and performance optimization. Experienced in working on enterprise-scale applications in insurance and healthcare environments, and eager to grow further while contributing to stable and scalable backend systems.

PROFESSIONAL EXPERIENCE

TATA consultancy services (TCS)

Mar 2022 - present

System engineer. Chennai.

Project-1: USAA Automobile Insurance and Financial Services.

Overview:

USAA provides a variety of personal property and casualty (P&C) insurance products, including automobile, homeowner, and renters insurance, as well as umbrella and personal property insurance. In addition to P&C insurance, USAA offers whole life, term life, and annuities.

Role: Backend Developer

Responsibilities:

- * Developed and maintained backend microservices using Java, Spring Boot, and JPA/Hibernate, supporting business-critical features in enterprise applications.
- * Designed and implemented RESTful APIs, enabling secure and reliable integration with internal systems and third-party services.
- * Applied Spring Security for authentication and authorization to protect APIs and ensure secure access control.
- * Implemented Kafka-based asynchronous communication to support event-driven workflows and improve system scalability and reliability.
- * Worked with MongoDB and relational databases, contributing to data modeling, query optimization, and performance improvements.
- * Improved application performance by optimizing database queries, applying caching strategies, and reducing API response times.
- * Collaborated closely with QA, DevOps, and product teams during Agile sprints to deliver stable, maintainable, and well-tested solutions.
- * Participated in code reviews, debugging, and production issue analysis, helping maintain code quality and system stability.
- * Contributed to discussions on microservice design and best practices, continuously improving development standards within the team.

Project-2: Walgreens Pharmacy Retail Service

Overview :

Walgreens Pharmacy Retail Service App – A national healthcare solution in the United States for managing prescription and pharmacy inventory and retail services at thousands of stores. Helped to build and improve backend services that support prescription processing, inventory sync, and secure integration with third-party healthcare systems and insurance companies to assist with accuracy, compliance, and efficient pharmacy operations.

Role : Backend Developer

Responsibilities:

- * Developed and enhanced backend services using Java and Spring Boot, supporting core application functionality and business workflows.
- * Designed and implemented RESTful APIs to enable reliable real-time order processing and smooth integration with frontend and external systems.
- * Built and deployed microservices-based components, improving system modularity and supporting application scalability as usage increased.
- * Performed code reviews and unit testing to maintain code quality, stability, and long-term maintainability.
- * Collaborated with cross-functional teams including QA, DevOps, and product stakeholders to ensure timely delivery and successful system integration.
- * Assisted in troubleshooting production issues and applying fixes to ensure consistent application performance.

Helixotech Private Limited. Chennai .

Java developer, Chennai

Project/Client: Curebay Healthcare

Overview:

CureBay Healthcare is a technology-driven hybrid healthcare platform founded in 2021, focused on expanding access to high-quality and affordable healthcare services in underserved rural and semi-urban regions of India. The platform combines digital health technology with a network of physical eClinics and trained local health workers to deliver medical consultations, diagnostics, pharmacy services, preventive care programs, and referrals to advanced care..

Responsibilities:

- * Assisted in developing backend services using Java and Spring Boot as part of the core application.
- * Supported the development and maintenance of RESTful APIs used by system features and mobile applications.
- * Worked with the team on microservices-based components, helping improve application modularity.
- * Implemented message-based integration with third-party systems, supporting asynchronous data exchange and improving reliability between internal services and external platforms.
- * Integrated third-party APIs under guidance to enhance application functionality.

- * Helped identify and fix backend issues through debugging and basic troubleshooting.
- * Deployed Spring Boot applications on Apache Tomcat, including basic domain configuration.

A2 Consulting and Projects Private Limited

Dec-2019 - Mar-2022

Java developer. Chennai .

Overview: A remote patient monitoring and health management app that combines vital sign data, accelerates patient-centered engagement, and makes daily care activities easier. Unica's real-time alerts for vital signs that may indicate an abnormal event, medication adherence, secure updates of care plans, and private communications between patients and the clinical team are all seamless features of our platform

Responsibilities :

- * Joined as a Java Developer trainee and gradually learned the Spring Boot framework while working on backend modules.
- * Assisted in developing basic backend functionalities using Core Java and Spring Boot under senior guidance.
- * Supported the creation and testing of REST APIs for application and mobile features.
- * Worked with the team on microservices-based components to understand service-to-service communication.
- * Helped debug issues, fix minor defects, and support application stability.
- * Assisted in deploying Spring Boot applications on Apache Tomcat and verifying basic configurations.

EDUCATION

Master of computer applications(MCA)

Jun 2017 - July 2019

SASTRA University. Thanjavur.

Bachelor of computer applications(BCA)

Jun 2014 - May 2017

Bharathidasan University . Thanjavur.

HSC- Maths, Computer, Physics, Chemistry

Apr 2012 - May 2014

State board. Thanjavur.

SKILLS

Programming & Frameworks

- * Java
- * Spring Boot, Spring MVC, Hibernate, JPA
- * Node.js (learning – basics, REST APIs)

Microservices & APIs & Messaging

- * RESTful APIs
- * Microservices architecture
- * Kafka (event-driven communication – basic to intermediate)

Security & Integration

- * Spring Security (authentication & authorization)
- * OAuth 2.0, JWT
- * API integration with internal and third-party services

Databases

- * MySQL
- * PostgreSQL
- * MongoDB (basic exposure)

CI/CD, Version Control & Deployment

- * Jenkins (CI/CD pipelines)
- * Git / GitLab
- * Apache Tomcat

AWARDS

- On-the-Spot Team Award – Awarded for immediate support and contribution during a critical project phase.
- Best Team Award – Recognized for collaborative contribution to successful project delivery.
