PROFESSIONAL SUMMARY

Machine Learning & Full Stack Developer with hands-on experience building and deploying intelligent systems, data-driven applications, and full-stack platforms. **Worked as a Research Associate**, contributing to ML model development, data analysis, and full-stack implementations using Python, TensorFlow, and SQL. Skilled in delivering production-ready ML pipelines, e-commerce systems, and IoT simulations, and translating business problems into scalable technical solutions.

EDUCATION

Bachelor of Science in Computer Science

DG Vaishnav College, Chennai, India — *Graduated 2022*

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript (Basic)

Backend Development: Flask, RESTful APIs, FastAPI, Backend Architecture

Frontend Technologies: HTML, CSS, Bootstrap, Basic React.js

Databases: MySQL, PostgreSQL, SQLAlchemy

Data & ML: scikit-learn, TensorFlow, Feature Engineering, Model Integration

Visualization & UI: Streamlit, Tableau, Matplotlib, Altair

Tools & Deployment: Git, GitHub, Vercel, Hostinger

Core Concepts: API Design, CRUD Operations, Authentication, Personalization Systems

PROFESSIONAL EXPERIENCE

Research Associate

Avudai SK Infotech Solutions LLP — Chennai, India | *Aug 2024 – Nov 2025*

- Designed and developed **RESTful backend services** using Python and FastAPI to support data-driven applications.
- Built **end-to-end pipelines** connecting APIs, databases, and frontend dashboards.
- Implemented **role-based access logic** and backend validation for secure data handling.
- Optimized **backend** logic and data workflows, improving application performance and reliability.
- Integrated ML models into web applications, enabling real-time predictions via APIs.
- Worked on Developing **Webapplication** for various business requirements.
- Deployed internal tools and dashboards using Streamlit for business and research use cases.
- Collaborated with cross-functional teams on requirement analysis and system design.

PROJECTS

1. Multi-Brand E-Commerce Website with ML Recommender Systems

- Worked on full-stack React.js + Flask e-commerce platform with a MySQL database.
- Developed REST APIs for products, users, cart, orders, and admin operations.
- Designed a **personalized recommendation engine** using user behavior and product features.
- Designed scalable database schema and optimized queries for performance

2. Waste Segregation Bot (Deep Learning & Streamlit)

- Built a CNN to classify waste as biodegradable vs. non-biodegradable (accuracy: 91%).
- Implemented a real-time Streamlit interface for live image classification.

3. AI Resume Analyzer & Job Role Predictor

- Built an AI system to analyze resumes and predict suitable job roles using **NLP**.
- Integrated **Hugging Face Transformers** for job role classification.
- Implemented resume text extraction and preprocessing for real-world PDFs.
- Generated role probability scores for prediction confidence.

Live Demo: [Smart AI Resume](#)

4. Orizis Tech Solutions Website (Front-End)

- Designed and developed a responsive static website using HTML, CSS, JS, and Bootstrap.
- Applied **SEO** best practices and optimized performance for production hosting. Live Demo: [Orizis Tech Solutions](#)

5. 2D Street Fighter Game (Pygame)

- Built an interactive 2D game with dynamic collision detection and event-driven combat logic

CERTIFICATIONS

- **Java Full Stack Developer** – QSpiders (Jan 2023 – Sep 2023)
- **Complete Python Pro Bootcamp** – London App Brewery (*Ongoing*)
- **Robotic Process Automation (Beginner)** – UiPath
- **Internet of Things & Digital Media Publishing Tools** – DG Vaishnav College

OTHER INTERESTS

Kaggle Competitions, UI Design (Canva), Photography, Chess, Open-Source Projects
