SUMMARY

GenAI Engineer with 1+ year of hands-on experience in designing, building, and deploying Generative AI solutions using Large Language Models (LLMs). Proficient in Python, Prompt Engineering, RAG pipelines, embeddings, vector databases, and transformer-based models. Experienced with OpenAI APIs, Hugging Face, LangChain, LlamaIndex, and fine-tuning LLMs for real-world use cases. Strong understanding of NLP, text generation, summarization, chatbots, and semantic search. Skilled in model evaluation, token optimization, and cost-efficient inference. Familiar with cloud platforms (AWS), REST APIs, Git, CI/CD, and MLOps fundamentals. Passionate about building scalable, secure, and production-ready GenAI applications aligned with business needs.

WORK EXPERIENCE

GenAI Engineer, ENTRUST SOFTWARE

01/2025 – Present

Project: GenAI-Powered Loan Document Summarization System

- Worked on a GenAI-based loan document summarization project to generate concise summaries from banking loan documents using pre-trained LLMs.
- Used basic NLP techniques and text preprocessing in Python to extract and clean content from PDFs and unstructured loan documents.
- Assisted in applying prompt engineering to guide the LLM in identifying important loan details such as interest rate, tenure, and repayment terms.
- Supported implementation of a simple RAG approach by storing document embeddings in a vector database to improve summary relevance for long documents.
- Explored traditional ML and deep learning concepts to understand document classification and text representation used in the summarization pipeline.
- Containerized the application using Docker for local testing and consistent deployment across environments.
- Assisted in deploying and testing the summarization service in a cloud environment (AWS), following basic model deployment and version control practices using Git.

EDUCATION

B.Tech Information Technology,

2025

Anand Institute Of Higher Technology

CGPA: 8.3

SKILLS

Generative AI & LLMs

Generative AI, Large Language Models (LLMs), Text Generation, Document Summarization, GenAI Applications

Natural Language Processing (NLP)

Natural Language Processing (NLP), Text Preprocessing, Tokenization, Chunking, Named Entity Recognition (NER)

Deep Learning

Deep Learning, Neural Networks, Transformers, Text Embeddings

Development Tools , Deploy & Methodologies

Git, GitHub, Agile Methodology, Sprint-Based Development, Docker, RESTAPI, Vector Databases, FAISS, Pinecone, Hugging Face Transformers

Prompt Engineering & RAG

Prompt Engineering, Retrieval-Augmented Generation (RAG), Embeddings, Vector Search, Semantic Retrieval

Machine Learning

Machine Learning, Supervised Learning, Feature Engineering, Model Evaluation, Classification Models, Regression Models

Programming & Scripting & Cloud Tools:

Python, Pandas, NumPy, Regular Expressions, API Integration, Data Processing, AWS, Azure
