EDUCATION

PSG College of Technology, Coimbatore

Integrated - MSc Theoretical Computer Science

CGPA: 7.66

2019 - 2024

EXPERIENCE

MajorDomo Inc. (formerly Tailwinds.AI) | Software Engineer-AI/ML

Chennai, TamilNadu

Python, FastAPI, LlamaIndex, Gen AI, LLM, Pinecone, MongoDB, MCP server, OpenAI API Nov 2024 - present

- Integrated **vector databases** such as **pgvector** (PostgreSQL extension) and **MongoDB Atlas Vector Search** with **LlamaIndex** to build scalable **RAG pipelines**, enabling semantic search and relevant content generation.
- Combined data sources to enhance the application's capabilities for **LLMs**, resulting in a 35% improvement in answer relevance and achieving a 80% customer satisfaction rate for AI-assisted interactions.
- Built scalable AI agents with **Agent-to-Agent (A2A)** communication, automating complex workflows and improving process efficiency by 30%.

MajorDomo Inc. (formerly Tailwinds.AI) | Software Engineer Intern-AI/ML

Chennai, TamilNadu

Python, FastAPI, LlamaIndex, MongoDB, OpenAPI, Pytest, Aws, Docker Aug 2024 - Oct 2024

- Improved test coverage by writing unit tests and utilizing **pytest** fixtures to create efficient and reusable test setups, resulting in a 40% decrease in production defects.
- Developed a scalable RESTful API to monitor user activity, enable dynamic profile updates, and handle **query pipelines** for processing user queries.

CODESTAX.AI | Software Developer Intern

Chennai, TamilNadu

ReactJs, Jest, Javascript, NodeJS, MongoDB Jan 2024 - Jun 2024

- Enhanced code quality and functionality by implementing and maintaining 80% unit test coverage using the **Jest framework** ensured a robust testing environment, leading to a 30% increase in code stability.
- Implemented a seamless third-party **product catalog** integration, partnering with the project manager to identify and address integration requirements, resulting in a 20% increase in user access to accurate and up-to-date product availability details.

Python, NodeJS, MongoDB, Looker Studio, Bigquery Jun 2022 - Dec 2022

- Optimized and architected algorithms to efficiently extract data from **MongoDB** and seamlessly transfer it to **BigQuery** using **Pymongo** and **Google Cloud Platform** libraries, enabling integration with data visualization tools for robust and insightful analytics.
- Developed 5+ workflows (sales CRM, product approval, etc.) using **Looker Studio** to craft customizable reports, effectively presenting the features and functionalities of **workflow automation software** to key stakeholders.

PROJECTS

ForecastPro | Web Application

- ForecastPro** is a weather application built with **ReactJS, NodeJS**. User can search locations by city name and observe the weather for the next 5 days. Empowering users with accurate weather predictions and seamless navigation.

Edumatch | Course Search with Sentence-BERT

- Built an interactive course search tool using **Sentence-BERT** for high-relevance **semantic search**. Integrated **Streamlit** for a smooth UI and optimized embedding handling with **PyTorch**.

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, HTML/CSS, SQL

Frameworks and Tools: FastAPI, LlamaIndex, NodeJS, ExpressJS, Pytorch, ReactJS

Generative AI Technologies: Open-source and commercial LLMs(OpenAI, Gemini, Anthropic)

Coursework: Data Structures, Object-Oriented Programming, DBMS, Machine Learning, Deep Learning

Database and Vector Database: MongoDB, Pinecone, PostgreSQL (pgvector)

Developer Tools: Git, Postman, VS Code, Aws, Docker
