PROFILE

Backend Developer API Automation Tester with 3+ years of experience in designing, developing, and testing scalable web applications. Proficient in Node.js, Laravel, Java, SQL, and Selenium, with hands-on expertise in API integration, database optimization, and test automation. Strong team collaborator with the ability to deliver high-quality, efficient, and maintainable software solutions..

EDUCATION

Bachelor's Degree in Electronics and Communication Engineering, 2016 – 2020

EXPERIENCE

BackendDeveloper and API-Tester

SmackCoders–Tirunelveli,
June2025–present

- Design, develop, and maintain backend systems using Node.js and Laravel frameworks.
- Create and optimize RESTful APIs for frontend integration (React, Angular, Vue).
- Implement authentication, authorization, and role-based access control
- Design and manage relational and NoSQL databases
- Integrate third-party APIs (payment gateways, email, SMS, cloud storage).
- Manage code versioning, deployment, and documentation.
- Collaborate closely with frontend, QA, and design teams to ensure seamless integration.
- Provide backend support and production system maintenance

Data Support Engineer-Automation Tester

BentekAutomation–Chennai,
Jan2024–Feb2025

- Work as a Data Support Engineer and Automation Test Engineer, an individual contributor and a team player.
- Analyze, Design, Coding and integration in FTPC tool.(Java and SQL).
- Identify and Debug issues with code and suggest changes or improvements.
- Designed, developed, and maintained automated test scripts using Selenium WebDriver
- Participated in Agile sprint planning meetings, daily stand-ups, and sprint reviews to align testing activities with development goals.
- Documented and tracked defects in Jira, providing detailed reports and re-testing after fixes
- Improved overall product quality by identifying 20+ critical defects early in the development cycle.

- Performed manual testing on various web and mobile applications, ensuring they met functional and performance requirements.
- Executed test cases for functional, regression, UAT and worked closely with the development team to resolve issues.
- Participated in the creation of test scenarios and test cases based on project requirements.
- Wrote and executed SQL queries to validate database integrity and perform backend testing.
- Analyzed requirements, identified testing risks, and worked to mitigate those risks with appropriate test
- Participated in the creation of test scenarios and test cases based on project requirements.
- Wrote and executed SQL queries to validate database integrity and perform backend testing.
- Analyzed requirements, identified testing risks, and worked to mitigate those risks with appropriate test strategies.
- Reported bugs and issues found during testing cycles to the development team, ensuring timely resolution.
- Worked on the API Testing (Postman App). Have knowledge in the X- ray tools (JIRA).
- I have participated and given demo's to the Business Analyst on deployed user stories.

SKILLS

- Backend Development: Experienced in Node.js, Laravel (PHP), and RESTful API development.
- Database Management: Proficient with MySQL, MongoDB, PostgreSQL, and Oracle for relational and NoSQL
- Automation Testing: Strong command of Selenium, TestNG, Cucumber, Postman, and manual test cycles (UAT, Regression, Integration).
- API Security: Skilled in implementing authentication and authorization (JWT, Passport, Sanctum) and ensuring
- API security (CSRF, XSS, SQL Injection prevention).
- Version Control Collaboration: Experienced with Git, Jira (X-ray plugin), and Agile Scrum practices

ACHIEVEMENTS

- Completed internal projects in Student Management Portal (Registration, Marksheet, and Attendance modules), using both Node.js and Laravel — implemented marksheet download and email features for automated communication.
- Completed internal projects using OutSystems: Hotel Booking App Bank Account Opening App.
- Led a team of 4 testers under Agile methodology to improve product quality .
- Improved product quality by identifying and resolving critical issues early in the development cycle.
