Email: t.sahityabharathi24@gmail.com | Phone: +91-7993245519 | Location: Hyderabad

Professional Summary

Software Test Engineer with **4.3 years** of experience in **manual and automation testing**. Proficient in **Selenium WebDriver (Java), TestNG, Apache POI and Data Driven Framework** with expertise in **SDLC, STLC, Agile, and Waterfall methodologies**.

Experienced in **Insurance** domain, ensuring high-quality financial applications. Strong skills in **test automation, defect tracking, regression testing and manual testing**. Looking for an opportunity to contribute technical expertise in **quality assurance and test automation**.

Core Competencies

- Manual and Automation Testing
 - Functional, Regression, Smoke, and System Testing
 - Selenium WebDriver (Java), TestNG, Maven
 - Agile, Scrum, and Waterfall Methodologies
 - CI/CD Integration (Jenkins)
 - Defect Management (ALM, ADO)
 - Visual Studio
 - SQL
 - Ready API
-

Work Experience

Accenture, Hyderabad

Test Engineer | August 2021 – Present

Key Responsibilities:

- Designed and executed **automated test scripts** using **Selenium WebDriver (Java)**, reducing manual testing effort by **45%**.
- Contributed to and maintained **data-driven automation frameworks** using the **Page Object Model (POM)** with TestNG and Apache POI.

- Performed **functional, regression, smoke, accessibility, and API testing** to validate software applications.
 - Created, reviewed, and executed **test cases in ADO and ALM**.
 - Identify the defects and documented test results and reported defects using **ALM and ADO** facilitating clear communication with the development team.
 - Integrated **automated test execution with Jenkins CI/CD pipeline**, ensuring continuous testing.
 - Collaborated with developers and business analysts to analyze requirements, identify the scenarios, and review the test cases.
 - Provided test metrics and automation progress reports to stakeholders at the end of each sprint.
-

Projects Details

Project 1: Royal London Insurance

Role: Quality Engineering Analyst | **Feb 2023 – Present**

Tools & Technologies: Selenium WebDriver (Java), TestNG, Apache POI, JIRA, ADO, Jenkins, Git.

Project Overview:

Supported the testing and quality assurance of critical hedging-related applications, including **Adviser Portal, Customer Portal and GCS user** ensuring the accuracy and reliability of financial risk management tools. Mentored and managed a team of 15 QA engineers, focusing on continuous improvement and skill development. Promoted an agile environment, collaborating closely with cross-functional teams to solve problems and optimize testing processes, leading to timely delivery of testing milestones.

Key Responsibilities:

- Automated **UI regression testing** using **Selenium WebDriver (Java)** and **TestNG**.
 - Created and maintained **comprehensive regression test suites in ADO**.
 - Executed **automated test scripts in Jenkins**, ensuring **continuous test execution**.
 - Reported and tracked **defects in ADO**, working closely with developers for quick resolutions.
 - Ensured test coverage by performing **manual testing alongside automation efforts**.
-

Project 2: AXA XL Catlin

Role: Application Development Associate | Nov 2021 –Feb 2023

Tools & Technologies: ALM,Genius,Wins

Project Overview:

AXA XL Catlin is the global brand used by XL Group Ltd's insurance and reinsurance subsidiaries. The project involved ensuring the quality, functionality, and performance of the applications to deliver a seamless user experience.

Key Responsibilities:

Wrote and executed **2000+** scenarios and test cases for monthly/weekly releases without any timeline leakage.

- Have raised **60+** defects with zero percentage UAT/production defect leakage.
 - Played key role in testing one of the most complex and lengthiest requirements consisting of **262** test cases with maximum test coverage and zero production leakage in single release.
 - Assisted business Users in demo activity.
 - Have learnt and automated test scripts in Smart eye.
 - Initially as part of POC, performed R&D on the new tool Smart eye. Also, extended working hours to support in creating automation scripts.
 - Helped team in setting up environment for Smart eye.
 - Supported business users in UAT execution.
 - Did multiple scenario reviews and ROM estimation on monthly/weekly release items.
 - Demonstrated patience in understanding team's problem and solved them immediately.
 - Guided new joiners/freshers in writing test scenario and test cases and created a comfort zone for them. As a result, till date there is no fallout or no production leakage on their test scenario/cases.
 - On absence of any team member, took complete ownership of their delivery within the timeline of their leave.
 - Gained KT from the vendor and conducted multiple working sessions for functional and automation teams.
 - Helped development team members and BAs in reproducing critical defects.
 - Provided technical support to the QA team as well as to the dev team.
-

Technical Skills

Programming Languages: Core Java

Automation Tools: Selenium WebDriver (Java), TestNG, Maven

Test Management Tools: ADO, ALM

Bug Tracking Tools:ADO, ALM

Version Control: Git

CI/CD Tools: Jenkins

Frameworks: Data-Driven Testing

Design Pattern: Page Object Model (POM)

Operating System: Windows

Education

- **B. Tech** (2017-2021) from Vignan's Institute of Engineering and Women, Visakhapatnam with CGPA of 7.67.

Personal Details

Date of Birth: 24-April-2000

Marital Status: Single

Languages Known: English, Telugu

Declaration

I hereby declare that all details furnished above are true to the best of my knowledge and belief.

Place: Hyderabad
