

SRIRAM

Performance Tester

Chennai | sriramperfengineer@gmail.com | +91 8886501468

PROFESSIONAL SUMMARY

Performance Engineer with 4 years of experience in analyzing, testing, monitoring, and optimizing software applications across Financial domains. Skilled in identifying and resolving performance bottlenecks, developing custom testing scripts, and implementing robust performance monitoring strategies. Proven ability to improve system efficiency, reduce latency, and enhance user experience. Demonstrates a strong track record in optimizing enterprise-level applications ensuring scalability and reliability under heavy loads.

WORK EXPERIENCE

Performance Tester

Ebix Technologies, Chennai.

May 2023 – Present

- Designed NFRs, conducted, and analyzed performance and benchmark tests for LOS,LMS & Collection applications.
- Developed performance test scripts and scenarios for load, parameterization, and correlation, integrated with tools such as JMeter & Blaze Meter.
- Proficient in performance testing methodologies, tools, and techniques, including **Load, Stress & Endurance testing**.
- Executed diverse performance tests using **JMeter**, providing 95th percentile test results, response time reports and detailed analysis reports
- Worked closely with offshore teams to ensure seamless collaboration and project delivery.
- Maintained test documentation and reported test progress to the QA manager.
- Monitored performance metrics comprehensively using **Dynatrace**, offering valuable recommendations.
- Analyzed test results and identified performance bottlenecks, working closely with development teams to implement optimizations.
- Generated comprehensive performance test reports, highlighting key metrics and recommendations for improvement.

Performance Tester

IDC Technologies, Noida

March 2022 – April 2023

- Worked on Performance Test Plan, gathering NFR & SLAs.
- Preparation of Scripts, Scenario based on functional requirements and executing them.
- Monitoring the CPU, memory, send request, received requests, Analyze & publish the Performance test result.
- Executed the load , stress & Endurance test using JMeter tool.
- Monitored online graphs like Transactions Per Second (TPS), Throughput, and Response time at Client side and analyzing them after the completion of test.

SKILLS

- Testing Tools: JMeter, Blaze Meter.
- Monitoring Tools: Dynatrace
- Project Management: JIRA, Microsoft Office.
- CI/CD: Jenkins
