

L.SURESH

Java Full Stack Developer

+91 8608198135 | pandianlogan3003@gmail.com | www.linkedin.com/in/suresh-logandurai-372642201

PROFESSIONAL SUMMARY

- Full Stack Developer with over **4 years** of experience in end-to-end software development life cycle, from designing and development to implementation, testing, and deployment of Dynamic Web applications and Cloud-Based Enterprise applications.
- Worked on projects implemented using **JAVA/J2EE** technologies, **Spring Frameworks**, **Microservices**, **Restful** web services and **Hibernate**. Working knowledge in tools like **Maven**. Also, proficient in writing and handling **SQL queries**.
- Hands on experience in Front-end technologies like **React JS**, **JavaScript**, **HTML** and **CSS**.
- Experience with **Agile** and **Test-Driven Development**.
- Testing tools like Postman and API documentation tool like Swagger.
- Efficiently used Git and Git Hub to communicate the front-end team and version control.

TECHNICAL SKILLS

BACKEND TECHNOLOGIES : Java, SpringBoot, Microservices, Hibernate/JPA, Spring Security, Restful web services, JDBC.

FRONTEND TECHNOLOGIES : React JS, JavaScript, Node JS, HTML, CSS.

DATABASES : My SQL, Mongo DB.

OTHER TOOLS : Maven, Postman, Swagger, Git and Git Hub, Agile methodology.

PROJECT EXPERIENCE

HCL Tech (May 2025 – Sep 2025)

Senior Software Developer

Project: Casis Netwest (Banking Application)

Project Summary:

A large-scale banking application designed to manage customer accounts, transactions, validations, and secure service communication across distributed microservices.

Roles & Responsibilities:

- Designed and developed **RESTful APIs** using **Java 8** and **Spring Boot** to support **banking operations**.
- Implemented **business logic, validations, and exception handling** to ensure **data integrity and compliance with banking standards**.
- Integrated microservices communication using **FeignClient**, ensuring seamless interaction across modules.
- Developed and executed unit and integration tests **using JUnit and Mockito to improve test coverage and code quality**.
- **Optimized backend services with multithreading to enhance system performance and transaction processing**.
- Worked with **MySQL** database for persistence, writing optimized queries and managing schema changes.
- Collaborated with cross-functional teams in an Agile environment, participating in sprint planning, code reviews, and daily standups.

Technologies: Java 8, Spring Boot, Microservices, FeignClient, RESTful APIs, JUnit, Mockito, Multithreading, MySQL, Git, Agile methodology.

Achievements:

- Improved API response time by 20% through optimized multithreading and query performance tuning.
- Enhanced code quality by achieving 85%+ unit test coverage with JUnit & Mockito.
- Contributed to a secure and scalable banking microservices ecosystem, reducing manual validations by 30%.

CECIPL (Dec 2021 – May 2025)

Designation: Programmer Analyst

PROJECT 1: CRM APPLICATION

PROJECT SUMMARY:

- This application is about Customer-Relationship Management based project.
- The primary goal of the CRM project is to provide a centralized platform for managing customer interactions, improve sales and marketing, growing businesses.

ROLES & RESPONSIBILITIES: As a Java Full Stack Developer:

- Develop Front-end Using **React js, HTML, CSS, JavaScript, Bootstrap**.
- Develop efficient **Java codes** using **coding standards** and **design pattern**.
- Develop **Restful API** for **CRM Application (Customer Relationship Management, Lead tracking, Sales, Marketing, issue support)** and implement business logic using **Spring Boot Dependency Injection** and others features.
- Manage persistence layers using **JPA/Hibernate** and **design relational database** like **MySQL**.
- Use testing tool like **Postman** for testing API in CRM Application.
- Use **spring security** for **Authentication, Authorization** and also encrypt sensitive data.

TECHNOLOGIES: React js, Java, Restful API, Spring boot , Spring Data JPA(Hibernate), Web Servers, MySql, Postman, Swagger , Spring Security , LOGGING SLF4J , IntelliJ IDEA ,STS

ACHIEVEMENTS:

- **Customer Engagement:** Increased Customer retention by 20% through effective tracking and communication.
- **Sales Growth:** Improved lead conversation rates by 30% with streamlined process.
- **Efficiency:** Reduced ticket resolution time by 40% through workflow.

EDUCATION :

B.E (Mechanical Engineering)

Nadar Saraswathi College of Engineering and Technology at Theni.
