SUMMARY

I am a dedicated Java Backend Developer with 4 years and 5 months of experience in designing, developing, and supporting scalable backend services. I have a passion for writing clean, maintainable, and high-performance code. I possess strong exposure to enterprise applications and a continuous drive to learn and contribute effectively within dynamic teams

EDUCATION

Bachelor of Computer Application **92%**

Fatima College

June 2018 – June 2021

HSC **81%**

M.A.N.U.Girls Higher Secondary School

June 2016 – May 2018

SSLC **91%**

M.A.N.U.Girls Higher Secondary School

June 2015 – May 2016

WORK EXPERIENCE

Cognizant, Chennai - Associate Projects

Jan 2025 – Present

Wipro Limited, Chennai - Scholar Trainee

Aug 2021 – Jan 2025

SKILLS

- | | | | | |
|----------------|----------------|--------------|-------------|-------------|
| • Java | • Oracle | • React js | • AWS | • Postman |
| • Spring Boot | • MySQL | • JavaScript | • Putty | • Jenkins |
| • Microservice | • Git & GitHub | • Thymeleaf | • CI/CD | • Splunk |
| • Rest API | • Kafka | • Unix/Linux | • SonarQube | • Dynatrace |

CERTIFICATIONS

- AWS Cloud Practitioner

LANGUAGES

- Tamil
- English

ACHIEVEMENTS

- Received client appreciation twice for timely delivery, quality of work and effective support during critical releases.
 - Awarded client incentive in recognition of consistent performance and contribution to project deliverables.
-

PROJECTS

Toronto-Dominion Bank (TD Bank)

Jan 2025 - Present

-
- Working on code migration from Spring Framework to Spring Boot 3.4.x and Java 8 to Java 17, ensuring compatibility with updated dependencies and frameworks.
 - Refactoring legacy code to align with Java 17 features, updated APIs, and Spring Boot 3.4.x standards.
 - Updating application configurations, dependencies, and build files to support Spring Boot 3.4.x.
 - Validated migration through Maven builds, unit tests, and functional testing.
 - Resolved TICS issues where IBM Kyndryl screens were not updating, ensuring smooth user experience.
 - Implemented and executed unit tests with JUnit and Mockito test cases with > 90% test coverage and met SonarQube quality gate always.
 - Worked on SQL scripts for data analysis, data validation, and controlled data updates in support of application enhancements and production fixes.
 - Worked on back population of legacy data to apply newly introduced business rules to existing records, ensuring data consistency across legacy and newly created accounts.
 - Worked on the DB related deployment by updating the automation scripts.
 - Conducted code reviews and enforced best practices, increasing maintainability and reducing rework.
 - Collaborated with QA during deployment, ensuring timely defect resolution and successful releases.

BNYM - Bank of Mellon

May 2022 – Dec 2024

-
- Worked in an Agile environment, delivering assigned tasks within sprints and actively participating in stand-ups and sprint planning.
 - Proficient in developing and maintaining RESTful web services and integrating APIs for microservices-based architecture.
 - Developed backend components and microservices based on business requirements, ensuring scalability and maintainability.
 - Strong understanding of HTML, CSS, and JavaScript.
 - Hands-on experience with data structures and algorithms, ensuring efficient code optimization and performance tuning.
 - Identified and resolved code issues, including errors, exceptions, and unexpected behavior, ensuring smooth application performance.
 - Utilized Java 8 features, including Streams, Lambda expressions, and Collection Framework, to enhance code efficiency and maintainability.
 - Built and maintained responsive, user-friendly web applications using React.js.
 - Implemented React Hooks (useState, useEffect, useContext) for state and lifecycle management.
 - Worked with React Router for client-side routing and navigation.
 - Participated in the ebat2 server deployment. Worked on the properties file updating activity.
 - Experience with AWS EC2 for hosting backend applications and managing application environments.
 - Used Amazon S3 for storing application files, logs, and reports.
 - Familiar with AWS IAM roles and policies for secure access management.
 - Monitored application health using AWS CloudWatch logs and metrics.
