

S Udaya Prakash

Performance Tester

 udayas9102@gmail.com  7395887397

SUMMARY

Performance Tester with 4 years of experience in end-to-end and component-level performance testing in the telecom domain. Strong expertise in Apache JMeter, NFR Gathering, workload modeling, test design, test execution, report preparation and result analysis. Hands-on experience with monitoring tools such as AppDynamics, Grafana, and InfluxDB for bottleneck identification. Proven ability to collaborate with development and infrastructure teams to improve application scalability, stability, and SLA compliance.

PROFESSIONAL EXPERIENCE

Performance Tester 13/12/2021 – Present

Tata Consultancy Services, Chennai

- Collaborated with business stakeholders and architects to gather **Non-Functional Requirements** (NFRs) and define performance acceptance criteria.
- Designed performance **test strategies, workload modelling**, and user distribution based on production data and business usage patterns.
- **Developed and Tested 50+ JMeter scripts** covering critical customer and agent journeys for mobile and web applications.
- Performed **load, stress and endurance**, testing to validate application readiness for production.
- Executed **distributed performance tests** across multiple load generators to simulate high concurrent user traffic.
- Monitored application and infrastructure metrics including **CPU, memory, GC** using AppDynamics and Grafana dashboards.
- Analyzed **performance test results** and identified application, database, and infrastructure **bottlenecks**.
- Prepared detailed performance test **reports** with observations, risk assessment, and optimization recommendations.
- Logged, tracked, and managed performance **defects** in **JIRA**, working closely with development and infra teams for resolution and re-validation.
- Actively participated in **Agile** ceremonies and provided regular status updates on performance activities.

SKILLS

Performance Testing — Performance Test Strategy & Planning | Workload Modeling & Scenario Design | Root Cause Analysis | Bottleneck Identification | Performance Reporting & Recommendations

Tools & Technologies — Apache JMeter | BlazeMeter | Postman | AppDynamics | Grafana | InfluxDB | HTTP/HTTPS | JDBC | SFTP | Kafka

Testing Types — Load | Stress | Endurance | Component-Level | End-to-End Testing

Metrics & Analysis — Response Time | Throughput | TPS | Error Rate | Percentiles (P90) | SLA Compliance

Database & Scripting — Parameterization | Correlation | Basic Java | Regular Expressions | PostgreSQL (Query Writing & Data Validation)

Process & Tools — Agile/Scrum | JIRA | Confluence

Version Control — Git | GitHub

EDUCATION

Karpagam College of Engineering, Coimbatore
B.E - Electrical and Electronics Engineering

28/08/2017 – 23/04/2021
