in Vigneshwaran Sekar

Summary

- Full stack Developer with **5.2 years** of experience in Web Application development, Testing, Code Analysis, Design and Implementation of projects in the area of technologies such as **Java, Spring Boot, Hibernate, Rest Api's, and Angular.**
- Passionate about developing innovative and efficient software solutions that meet Business needs.
- Skilled in working with **Core Java, Java 8, Spring, Spring Boot, REST API, JPA and Angular.**
- Excellent at managing priorities based on project demands.
- Exhibited excellent management capabilities in shifting priorities and adapting to project demands

Skills

Programming Languages : Core Java, Java 8, Spring Boot, Hibernate, JPA, JSON, REST Api, Angular, Oracle database.
Others : SVN, GIT, JIRA, Jenkins

Experience

Software Developer | Intellect Design Arena,

May 2024 – Present

- Developed and maintained Fintech applications using **Angular, Spring Boot, Java.**
- Involved in understanding requirements and estimating effort regularly.
- Created many reliable RESTful API using **Java, Java 8 and Spring boot.**
- Worked with an **Agile methodology and participated in Scrum meetings** throughout the project.
- Fixed Production & UAT Issues and Unit Testing of the Product to ensure the Performance.

Nov 2020 – April 2024

Junior Software Engineer | Sysarc Infomatix Pvt Ltd,

- Having hands-on experience in Product Development from Design to Production.
- **Contributed Ideas and Suggestion in team meetings and Delivered Updates** on Deadline.
- Experienced in Developing the User Interface screens using Html, Css, Typescript.
- Identified and resolved bugs to ensure application efficiency.

Project Details

Client - Karur Vysya Bank, Indian Bank

Project - Payments & Transactions, VAM

- Designed and implemented many **RESTful APIs** for banking transactions, including functionalities such as **account balances, account statements, transaction histories, status update of Onboarding, fund transfer**.
- **VAM** (Virtual Account Management), the history for all the pre-existing screens will be displayed in a new Screen/window, showing the previous and next modifications made by the existing screens.
- Developed clean, optimized, and refactored code that adheres to industry standards, promoting a loosely coupled architecture for improved readability, maintainability, and performance.
- Used **Stream Api's** for processing the data that retrieved from the database as well as from Api response.
- **Integrated Many REST Full Apis** in the source and ensured high-performance back-end services for seamless banking operations.
- **Optimized database queries** to improve execution speed and scalability.
- Refactor existing services to improve performance and efficiency.
- Used **Jenkins** for taking Build.
- **Optimized GIT repositories** by streamlining branching strategies, reducing merge conflicts, and improving version control efficiency.

Client - UCO, UBI

Project - Loan Origination System (LOS)

- This is used to creating Customer Profiles, Calculate Eligible Loan Amount, Generate loans up to Disbursement initiation which is an End-to-End software built for Retail, MSME and Agri Module.
- Developed Customized, Interactive User Interface Screen using **Angular 8 , Angular 14**.
- **Used Spring Boot framework** to write the Application Code and Business Logics in Java, Java 8, OOPS and Collections.
- Created many **REST, SOAP Web services, handled with Json , xml Request, Response**.
- Used Swagger for the Web services which gives all our service APIs documentation, request, response, headers, body and response details
- Used **Java Persistence API(JPA)** ORM for Database connection and Mapping Java classes to database.
- **GIT** version control for the source control repository.
- Used **Maven tool** for building and packaging the application in war, Jar File.
- Used JBoss, Websphere servers for deploying the WAR file in Local and also in UAT for testing.
- Good Experience in developing the Single Page Applications using **Angular 8 , Angular 14**.
- **Worked on the REST API** to create the services and tested on Postman tool and used in Angular HTTP service calls.

Education

B.E - Computer Science and Engineering, Jeppiaar Maamallan Engineering College

Aug 2016 – May 2020,
CGPA-6.68
